NEWS OF JOHN BENDER

WRITES INTERESTING LETTER TO HIGH SCHOOL TEACHERS ABOUT HIS WORK

The following letter which A. R. Oliver, head of the Mechanical Arts Department of Glendale High has received from John Bender, a former student, gives news of himself and other Glendale boys which should be of considerable interest to their friends here:

"Taft, Calif.,
Nov. 5, 1919.

"Dear Friends:—

"I haven't heard from you, so judge you haven't received the letters I have written. I am writing this letter to all of my teachers in the Mechanical Arts Department and hope it reaches you. Glendale is well represented in this field. Emerson and Carleton Padelford are working for the General Petroleum at Taft, Paul Smith and Arville Williams are working for the Santa Fe at Fellows, and I am working for the Southern Pacific at most any camp the Engineering Department chooses to send us to. Our crew does all the cement work—putting in concrete foundations for oil derricks, installing sewer systems, and concrete foundations for pumping plants. I am very much interested in the work and have taken every opportunity to learn something new as all I can learn now will be of some use to me when I get through college. I saw by the Glendale News that the Mechanical Arts Department now offers automobile repairing, oxy-acetylene welding and pattern making and I certainly wish I had another year of High School so I could take one or more of the new subjects offered. It seems lonesome up here without my old school and my friends, but I'll be down to Glendale for Christmas and will make it a point to see them all. I heard they have a T. N. T. Club in G. U. H. S. now to promote school spirit. I'm glad to hear of it and I certainly hope it accomplishes its purpose. I'd like nothing better than to have Glendale win the Southern California football pennant this year. From what I hear, she is well on her way to the League Pennant and here's hoping she gets it. I took a day off last month and visited the Conley High School at Taft. They have a fine school and lots of school spirit, but it doesn't measure up to Glendale. They have an enrollment of about 250 pupils. They have a night school with an attendance of 120 and a large waiting list. If I didn't have to move from camp to camp, I'd certainly attend. They teach French, Spanish, Business English, Typing, Book-keeping and Shorthand. I was especially interested in their Mechanical Arts Department. They have a fine wood-working shop and are working on their machine-shop which promises to be a good one when it is finished. I'll have to close for now and write a few more letters. Will write more later. Hoping to hear from you soon, I am as ever

"Your sincere friend,
"JOHN BENDER."

ADVENTIST CONFERENCE

More than a score of leading Seventh-day Adventists representing the eight local conferences on the Pacific Coast, including the States of California, Arizona, Nevada, Utah and Western Colorado, have been visitors to Glendale the past few days. They have been in attendance at a meeting of the Pacific Union Conference committee, the executive body for the states named.

F. E. Painter, field agent of the Pacific Union Conference of the Seventh-day Adventists, recently underwent an operation at the Glendale Sanitarium. He is improving in health, and expects soon to be at work again.

METHODISTS IN RETREAT

Rev. Clyde M. Crist, of the First Methodist Church of this city, and Revs. Smith, Cookman and Thayer have gone to Los Angeles this morning in response to the summons of Bishop Abner Wright Leonard who has called a "retreat" of all the ministers of the Southern California Conference, to be held in Trinity Auditorium, today, tonight and tomorrow. It will be confined to the ministers filling conference appointments and the discussions will relate to the work of pastors. There will be addresses by a number of prominent speakers, and the sessions will undoubtedly be exceedingly profitable to all who attend. They will be to the pastors what a teachers' institute is to instructors.

VOTE WATER BONDS

CITIZENS OF GLENDALE VOTE A \$260,000 WATER BOND ISSUE

At a very quiet election in the City of Glendale, Wednesday, Nov. 12th, there were 1,256 ballots cast in favor of bonding the city for \$260,000 for the purpose of making improvements and extensions in the present municipal water system, and there were 284 ballots cast against the project. The vote, by precincts, was as follows:

Precinct	No.	Yes	No
1	107	22	
2	138	39	
3	189	39	
4	80	16	
5	235	51	
6	229	21	
7	162	31	
8	29	57	
9	48	3	
10	39	5	
Total	1,256	284	

A WOMEN'S ELECTION BOARD

An election board composed entirely of women was the novelty presented at the polling place for Precincts 4, 5 and 7 at 115 West Harvard street in the Oakland Agency. When visited the middle of the afternoon Max Green, the Oakland representative, said he was having the time of his life and acquiring a great deal of information both personal and miscellaneous. Some of the board members are quite experienced in election procedure, having served before. Mrs. Minette Sherman was the inspector, Mrs. James McBryde, Mrs. C. D. Roach and Mrs. Tatlow were clerks, Mrs. Van Fleet and Mrs. Finch, judges. By eight o'clock the votes were all counted, the election reports written up and signed. The vote as turned in stood 138 in favor of the bonds, 39 against, or about the same proportions as the vote in other precincts. Three ballots marked with a pencil were thrown out as the law requires them to be stamped with a rubber stamp.

CERRITOS AVENUE BALL GAME

Cerritos Avenue school boys are quite cocky this morning following the soccer ball game played yesterday afternoon on the Glendale field with a team from Eagle Rock. The final score was a tie of one to one. No points were made by either side in the first half of the game and three halves were played in an effort to play out the tie. As the record now stands, Cerritos is ahead. Credit is given Paul Hall for kicking a goal for Cerritos. Donald Tyler made a most efficient goal keeper and allowed few balls to get past him, and Richard Ryan did fine work.

BOY SCOUT NEWS

WORK BEING ORGANIZED ON A VERY SATISFACTORY BASIS AND BOYS ENTHUSIASTIC

The newly-organized K. O. Troop of Boy Scouts No. 5 had a fine hike last Sunday to Dead Horse Canyon. Next Saturday at two o'clock they leave for a hike and picnic at Griffith Park, where they will take some of their knot tests. This troop has three Scout Masters, Messrs. Mullen, Henry and Monahan. It is possible that some of the boys of Tropico Troop No. 1 will accompany the new troops to Griffith Park.

Troop No. 1, above referred to, has changed Scout Masters. L. T. Rowley, who has been its leader, is too busy to give time and energy to the work any longer, has been superseded by George Loomis who will take charge at the Friday night meeting in the Magnolia Avenue School. He will have two assistant Scout Masters, Robert Taylor, who has been connected with the troop in that capacity for some time, and another man who will be appointed later.

The newly-organized troop of boys in the Central Avenue School has not yet been named but it is fortunate in having a very fine Scout Master in Mr. Kellogg, who ranks very high in Boy Scout work. He will accompany the boys on a hike Saturday afternoon to Twin Peaks.

ENTERTAINED AT DINNER

Mrs. A. W. Tower of 615 South Adams street entertained at dinner Tuesday night Rev. and Mrs. B. D. Snudden and Miss Isabel Isgrig. Mr. and Mrs. Snudden spent the night at Mrs. Tower's home and on Wednesday, Mrs. Snudden attended the all-day meeting of the P. E. O.

TENSE SITUATION AT CENTRALIA

UNIDENTIFIED MAN FIRES AT BRIDGE GUARD AND ESCAPES AFTER BEING PURSUED BY POSSE

(Special Service to Glendale Evening News)
CENTRALIA, Washington, November 13.—An unidentified man fired six shots at George Paxton who was a member of a posse guarding a bridge near here early today. The posse immediately gave chase and soon reported it had surrounded the man but after a few hours' siege the man escaped. One bullet had passed through Paxton's clothing but he was not injured.

More posses went into the Mendota district today where they expect to make highly important arrests. William Haynes was arrested this morning and is accused of having been a sharp shooter stationed on a ridge near where the parade passed and who fired numerous shots. Troops continue to patrol the streets.

SENATOR HITCHCOCK LOSES OUT

ATTEMPT TO FORCE VOTE ON LEAGUE OF NATIONS DEFEATED BY BALLOT OF 44 TO 36

(Special Service to Glendale Evening News)
WASHINGTON, November 13.—Senator Hitchcock, administration leader, presented to the Senate today a cloture petition to close debate and force a vote on the League of Nations. Senator Cummins of Iowa, who was in the chair, ruled the petition out of order because he said it attempted to dictate the future action of the Senate. Hitchcock appealed from his decision.

On motion of Senator Lodge, the chair was sustained and Hitchcock's appeal was tabled by a vote of 44 to 36.

DISTILLERS SECURE INJUNCTIONS

UNDER FEDERAL COURT ACTION WILL BE ABLE TO DISPOSE OF STOCKS OF LIQUOR

(Special Service to Glendale Evening News)
LOUISVILLE, Kentucky, November 13.—The federal courts today granted two Kentucky distillers temporary injunctions against the government's preventing them from selling their stocks of liquor under the war-time prohibition act. It was announced that other distillers not securing injunctions must not attempt to sell their stock on penalty of prosecution.

REDUCED CROP ACREAGE

SENATOR CAPPER OF KANSAS ANNOUNCES A "NEAR STRIKE" ON THE PART OF FARMERS

(Special Service to Glendale Evening News)
WASHINGTON, November 13.—Senator Capper of Kansas, himself the publisher of numerous farm journals, declared today that all indications point to greatly reduced crops next year. He said that the farmers will not exactly strike but that they are becoming sullen and that the acreage planted is decreasing seriously.

BRITISH HONORS FOR AMERICANS

PRINCE OF WALES TO DECORATE EIGHTY MEN AND SEVEN WOMEN BEFORE LEAVING U. S.

(Special Service to Glendale Evening News)
WASHINGTON, November 13.—It was announced today that the Prince of Wales will decorate with British orders eighty men and seven women before leaving the United States. The eighty will include Admiral Benson and General Crowder.

NO PAROLE FOR McNAMARA

DISTRICT ATTORNEY WOOLWINE REFUSES TO DISMISS EIGHTEEN INDICTMENTS STANDING AGAINST HIM

(Special Service to Glendale Evening News)
LOS ANGELES, November 13.—Following reports from San Quentin that J. J. McNamara is seeking parole, District Attorney Woolwine today revealed that he had refused the request of labor leaders throughout the country to dismiss eighteen indictments against McNamara in Los Angeles courts. McNamara cannot be paroled as long as these charges stand.

McNamara is serving fifteen years in San Quentin as a result of his part in the dynamiting of the Los Angeles Times and the Llewellyn Iron works in 1910. Woolwine said he refused to dismiss the indictments because he felt that McNamara's sentence is exceedingly light in view of the crime committed.

ROUND-UP OF RADICALS

JAILS OF NORTHWEST FILLED WITH HUNDREDS OF REVOLUTIONARY SUSPECTS

(Special Service to Glendale Evening News)
SEATTLE, November 13.—The authorities revealed today that several hundred radicals have been rounded up in the last thirty-six hours and are being held in jails throughout the northwest.

MODERN MAGIC

BIG AUDIENCE ENJOYS ENTERTAINMENT PROVIDED BY GLENDALE COMMANDERY

"All the world loves a lover," and also all the world loves a mystery. It was therefore no surprise to see a big audience responding to the invitation of the Glendale Commandery of Knights Templar to witness the magic performed by members of the celebrated Los Angeles Society of Magicians, of which Fred Roberts of Roberts & Echols, our own townsman, is a member. Mr. Roberts, however, modestly refrained from exhibiting his talents on the boards Wednesday evening. Every seat was taken and as many of the adults as possible brought children as a possible excuse for being there themselves, just as they would have taken them to the circus as a blind to their own weakness for that sort of entertainment. The children enjoyed it immensely and were frequently called upon to assist in the "experiments," to the great delight of the parents, who got as much joy out of the mystification and serious participation of the little folk as they did out of the cleverness of the performers. One little fellow who was amazed to see about two yards of bolognas removed from his coat by the magician as evidence of what he had eaten for dinner, was so determined to get at the mystery of the performance that he promptly removed his coat to see what else might be lurking there. The boys and girls were certainly a big factor in the show.

As explained by J. M. Foley, one of the old masters of magic, who has not forgotten the cunning of his youth, the small stage made it impossible to perform some of the elaborate tricks staged in theatres, but those that were presented were clever enough to baffle the wit of all in the audience who were not adepts.

W. J. Nixon paved the way for the artists by an appeal to those present to abandon dull care and respond freely to the fun to be furnished by himself and his fellow artists. As he circulated among the audience encouraging it to "smile, smile, smile," it was quite like a cabaret performance with a feast of fun substituted for eatables.

Mr. Nixon opened the performance with "A series of Quacks" the appropriate wording not being fully appreciated until the act ended. With great elaboration of detail and with the aid of three assistants, he made his "preparations," explaining that the object of the stunt would be to raise the query where do the ducks go? His evening coat was exchanged for a handsome Chinese coat beautifully embroidered and with the conventional flowing sleeves which he said he knew would at once excite suspicion. From three cages he removed three "knowing" wild ducks which were handled sufficiently to prove they were the real, live thing. In sight of the audience they were placed in a cabinet which was then smashed with a wand and discovered to be paper and the torn fragments were exhibited revealing the absence of the ducks, and the curtain went down without any attempt to explain what had been done with them. As the common course of a conjurer would have been to produce them from the back of his neck or from his flowing sleeves, the audience appreciated the sell.

One other such trick took place in the midst of some clever card manipulations in which cards were selected by the "assistants" called from the audience and replaced in the pack for the purpose of being located by the magician. In this instance, the three cards which were all jacks were named President Wilson, Kaiser Bill, and Billy Bryan. Dan Campbell, William MacMullin and Cameron Thom were on the platform. Mr. Thom was asked who he would like to see of the cards named. He responded: "President Wilson" and was promptly told he would have to go to Washington.

Wonderful juggling was done by Mr. Glyndon with dumb bells and knives while blindfolded, and some astonishing transformations and disappearances.

G. W. Robinson gave a series of cup and ball tricks which, he said, were almost as ancient as the sun and which he said were the basis of the race track games through which so much money is extracted from the gullible public.

An act which had special interest because of the peculiarly "dry" condition of the country, involved a pitcher furnished by Mr. Ravenscroft, an ordinary white enamel pitcher which he said contained water, but which under the manipulation of the magician yielded a fluid

(Continued on Page 3)

NEW SCHOOL TRUSTEE

L. T. ROWLEY APPOINTED TO FILL VACANCY CAUSED BY RESIGNATION OF JNO. TODD

On account of the strenuous demands of his auto trucking business, John Todd who for a number of years has been a member of the Glendale Grammar School Board of Trustees, a short time ago tendered his resignation as a member of that body. County Superintendent Koppel, who is empowered to fill such vacancies, requested the board members to recommend a successor and they named L. T. Rowley, who was at once appointed, notified accordingly by the County Superintendent's office. Mr. Rowley is greatly interested in educational matters and had about twelve years of service as school trustee in the Sunland District. While Mr. Todd's resignation was accepted with regret, board members feel they are to be congratulated on the appointment of Mr. Rowley to fill the vacancy in view of the many responsibilities which will rest upon the trustees in connection with the building program which has just begun, and in which they count on efficient help from Mr. Rowley.

MOTHERS' DISCUSSIONS

Quite an interesting discussion took place Wednesday afternoon at the Reading Circle, which is being held weekly at the home of Mrs. Hartley Shaw on Park avenue. The circle is reading Elizabeth Harrison's "Child Nature" and had been listening to the chapter on the training of the emotions and affections. Each mother had something to contribute in regard to the beginnings in the training of young children.

CHURCH NIGHT

Members of the Christian Church are quite complacent about the growing success of "Church Night," which they seem to have been pioneers in establishing in Southern California. Wednesday evening is Church Night for them and at every session there are visitors from abroad to observe how it works out and carry the report back to their own churches. Two visitors of that sort were so impressed that they came to Glendale to live and boost for the church that had so attracted them. Last night Mr. and Mrs. Poppy from the Magnolia Church, Los Angeles, were present as guests. Following the church supper which is served from 6 to 7 p. m. was the newly-inaugurated Bible Study class from 7 to 7:45. Then came the prayer meeting from 7:45 to 8:30, and from 8:30 on there were business meetings, including a session of the Sunday School Cabinet. Covers were laid at the supper for about fifty.

GLENDALE POLICE

FOUR OFFICERS ON DUTY AT NIGHT, THREE BY DAY, INCLUDING TRAFFIC COP

Because of the discussion about police protection and the advisability of having more watchmen, the extent of the police force of our city of 15,000 is a matter of some interest. According to Chief Lampert we have four officers on night duty. Each of those men has one night off a week. Three of the men have regular beats in the business section. The fourth man relieves them on their night off and the other three nights takes "outside territory," by which is meant territory in the south part of the city or residence sections in the middle and northern portions. All these men are in uniform.

During the day two police officers are on duty besides the motor traffic cop. These patrols have their headquarters at the Pacific Electric Station and at Fire Station No. 2 in the Tropico District where they can be reached by telephone call. Both night and day a desk sergeant is on duty at the City Hall. Mr. Brewster performing that service during the day and A. J. Van Wie at night.

Chief Lampert states that bulletins giving lists of articles lost through the burglaries committed in Glendale have been promptly sent to police headquarters in Los Angeles as soon as the robberies were reported because two men are detailed there to make the rounds of the pawn shops daily to look for stolen goods, and sometimes where articles can be identified they are located by these men.

WEATHER FORECAST — Fair tonight and Friday. No important change in temperature.

GLENDALE, CALIFORNIA, THURSDAY, NOVEMBER 13, 1919

IT IS MIGHTY EASY TO CRITICISE

Whenever anything goes wrong it is a very easy matter to find fault, but it is not so easy to suggest a successful remedy. However, suggestions do not cost much and when given in good faith should be received for what they are worth.

Glendale is a peaceful little city, the inhabitants being law abiding at all times, but now and then there comes into the midst of this peaceful community men and women bent upon taking into their possession property that does not belong to them.

Now, just what is the best way to check the covetous tendency of these people who enter homes and business houses and take valuable articles that do not belong to them is an important question. The uniformed officer standing on the street corner or patrolling the main business street does not hinder the ill work of the burglar for the reason that the regular program of the officer is soon learned by the law breaker and it is very easy for him to do his thieving where there are no officers.

The old way of having a city under the care of night watchmen during the dark hours seemed to get very good results. The night watchman was himself a sort of prowler who with his dark lantern frequented the shadowed and hidden portions of the city. It was never known when he would pass up or down a suspicious alley, and therefore the evil doer was at a loss to play safe with the old time night watchman. But now with a uniformed officer basking in the bright rays of the electric lights, and with the systematic red light signal that calls the officer away from one section of the city for a time, the burglar gets an excellent opportunity to get in his bad work. There is no criticism to offer as far as the officers are concerned but the question is, does the modern way get results?

WHO PAYS FOR TIME NOT EMPLOYED?

Some 400,000 coal miners are on strike in the bituminous coal fields for a six hour, five day week.

As many more steel workers are on strike for the "closed shop."

In New York drivers for butchers and provision dealers are on a strike for a 6-hour day and a scale running from \$102 minimum to \$245.50 a month.

In Pacific coast cities, tailors are on strike for a 45-hour week with a wage scale of \$1.00 an hour, including full pay for holidays when no work is performed.

Thousands of other strikes are in progress all over the country. Some of the strikes are justified by conditions; others are political and with the avowed intention of confiscating property and bringing on revolution.

American workmen are losing sight of one great point: It is their own job they are endangering, their own dinner buckets which will be emptied, their own homes which will suffer and their own nation which will be crippled.

Following commands of radical labor leaders in their present program of destruction, its like following the Pied Piper, the music is sweet but the end will be swift.

Labor can go the limit, wreck industry and cause a panic. This will automatically settle the labor problem. The "open" or "closed" shop will be a thing of the past for men will be glad to work for anything they can get in any shop.

Labor betted think it over. At present it is like a drunken sailor spending the savings of a successful voyage and taking no thought for tomorrow. Its leaders, who are not workers, but who draw high salaries from the toil of labor, are like the leeches who prey off the sailors, when the crash comes, it is the sailor and labor who pays.

A LODI STREET PROBLEM

Six cross town streets of Lodi end on "Cherokee Lane" along which the State highway runs. The space between the line of the State's right of way and the highway pavement leaves gaps at the end of these streets that are both disagreeable and dangerous jumping off places. The problem of how to solve this differently has worried the town authorities for months passed. Mr. James T. Langford brought the matter to the California Highway Commission's attention recently and has received the opinion of the Commission to the effect that the Commission does not care to establish the precedent of constructing connections with town or city streets, and directs attention to an act of the last legislature, Chapter 95, which permits counties, towns and road divisions to build pavements, curbs, or do other street work upon the State highway rights of way, providing the State's permission is first obtained, etc.

SAVING THE TREES

Frequent petitions are presented to the Highway Commission for permission to cut down the trees on the State highway, where property owners allege the said trees shade their land, or cut off their view, etc. The Commission's policy, in such matters, is to consider the larger interests of the public and to preserve, not only the trees, but all other land marks that make the highways attractive and traveling a pleasure. Mr. Henry Pankey of Irvine, Orange County, has recently been advised by the Commission that his petition to chop down certain eucalyptus trees in front of his property on the State highway is denied, for the reason that such trees are considered an enhancement of the beauty of the State highway and their removal is contrary to the policy of the Commission to preserve shade and ornamental trees along the State highway.

SUSANVILLE'S "CONNECTING LINK"

The California Highway Commission has informed the people of Susanville that Susanville will be expected to construct the connecting link of the State highway through the confines of that town. This is the reply made in response to the petition of the town trustees, who asked the State to build the highway through that corporation.

The Radicals can call strikes and tie up business, but on a show-down it is industry and payrolls that fill the dinner bucket.

ANNOUNCEMENTS

CHARGE FOR ANNOUNCEMENTS

The Glendale Evening News will charge for all announcements ordered published in its columns. Notices of clubs, schools, churches, society committees and business concerns will be comprised in the class of pay announcements.

The charge will be 50 cents minimum for eight lines, heading counted as two lines, six words to the line. Additional lines, five cents per line, all payable in advance when organization seeking publicity has not arranged for monthly settlement of accounts.

COMMUNITY SING

The Community Sing will hold its regular meeting this evening at 7:45 o'clock at the High School. Mrs. June Stone will be the soloist.

NOTICE

Glendale office of The Los Angeles Times moved to 100 S. Maryland; in rear Bentley-Schoeneman Lumber Co., facing Maryland. Phone complaints and ads to this office. Glendale 1402.

SINGLE TAX MEETING

A single tax meeting will be held next Saturday evening, Nov. 15th, at the Robinson home, 332 N. Maryland Ave. Mrs. Martha Y. Salver will give a brief opening address on Democracy. Mr. Wm. L. Ross will speak on the Single Tax. Questions and discussion will follow. Interests will be vocal solos by Mr. J. B. Clark and piano solo by Mrs. Vivian R. Webb. Everyone is cordially invited.

The City of Glendale desires to express its thanks to those people who so kindly gave their services toward the successful Armistice Day Reception in honor of the Service Men and particularly the following: Mr. Joseph Scott of Los Angeles, Mr. Dwight Stephenson, Mrs. E. B. Moore, Miss M. Irene Mueller, Mrs. G. W. Rowe, Elks' Orchestra. The City of Glendale, per Eva Daniels.

The Music Section of the Tuesday Afternoon Club will meet at the home of Mrs. Frank Arnold, 211 E. Lomita, Friday, Nov. 14th, at 2:30 o'clock. The entire program, which is Japanese, will be given by Mrs. Cleveland of Los Angeles.

University Extension Entertainments at the Union High School, 8 p. m. The Glendale City Teachers' Club will present a course of five entertainments as follows: Nov. 18—Mr. Harold Webster, violinist; Miss Ruth Hutchinson, lyric soprano. Dec. 2—Mr. Paul Jordan Smith, lecturer, "Mankind in the Making." Jan. 6—Mrs. Marion Craig Wentworth, dramatic reading, "The Midnight Meeting at Versailles." Jan. 20—Prof. Kiyo Sue Inoue, lecturer, "Japanese Immigration and Americanization." Feb. 3—Recital of Folk Songs: Alice Munna, soprano; Esther Rhoades, harpist; Blanche Seaver, pianist. Adult season tickets, \$2.00; student season tickets \$1.00; single admission, 50c. Tickets may be secured from Grammar School teachers.

ANCIENT MARINER COME TRUE

Coleridge's poem, the Ancient Mariner, has come true of present day conditions of ships lying idle in American harbors.

What a commentary on political interference with commerce and industry—48 wooden ships lying idle in Seattle harbor.

Think of 48 hulls built by the government, lying anchored when the world needs our products—idle as painted ships on a painted ocean.

These long rows of hulls lying on the bosom of lake Washington, were built by the government at a cost of about twelve millions.

The government wants to sell them but nobody wants to buy or operate a ship under present dictatorial conditions of labor to work them.

The demands of organized labor are such that loading and unloading are almost equivalent to surrendering the cargo, the crews are worse.

No one can be employed who does not belong to the International Seamen's union, and must be hired under the La Follette Seaman's act.

Under that law the crew can leave at any port, demand their pay and violate their signed contracts without recourse, and desert the ship.

Shipyards are refusing to build any more ships except on the open shop basis and construction is now so high capital will not buy ships.

Personals

Mr. and Mrs. Hartley Shaw and family of Park avenue spent Armistice Day at Hermosa Beach as the guests of Mr. Shaw's parents.

Young people's secretaries of Seventh-day Adventist Conferences on the Pacific Coast are holding a council meeting this week at the local Adventist church, Wilson and Isabel streets.

A jolly party of young people enjoyed a hike from Glendale to Griffith Park the afternoon of Armistice Day. It included Hazel Walters, Ruth Palmer, Faith Tarling and Messrs. Rowland Walters, Beryl Platt and Stanley Walker.

Mrs. R. C. Goudie, Sr., of 458 West Maple street, experienced a happy surprise when her sister, Mrs. Clara Freeman, and son, Albert, arrived from Chicago to spend the winter. Mrs. Goudie has not seen her sister in nine years.

Ben Elsgen and his wife have returned from the east after an absence of two months during which they have visited in Springfield, and other Illinois cities. They are at present with their aunt, Mrs. Louise Purnell, on Vine street, waiting for their home to be vacated by the parties to whom it was leased for the time they were to be gone. They expect to have possession by Saturday.

Mrs. Minette Sherman is experiencing that homeless feeling of which so many residents of Southern California are complaining. The house she has been occupying on Vine street has been sold to a Mr. Prince, and she is moving to a house on Ethel street, which she considers has been given a very "trifling name" and she is talking about circulating a petition to have it changed.

Dr. Jessie A. Russell, State President of the California Congress of Mothers and Parent-Teacher Associations, left Tuesday for an official visit to the northern part of the state. Wednesday she will address a large meeting in San Jose, where a luncheon, also, will be given in her honor. Mrs. H. J. Ewing, District President, will preside. Thursday the Bay City District will entertain for Dr. Russell with a luncheon at the St. Francis Hotel and Friday the Sacramento Federation entertains with a luncheon and an informal reception at the Hotel Sacramento. Saturday, Dr. Russell holds an executive Board conference at the Palace Hotel, San Francisco, returning home Sunday, so report her friends.

MASONIC NOTICE

The meeting of Unity Lodge, No. 368, F. and A. M., which was to have been held on Saturday evening, has been postponed until Tuesday, Nov. 18th, 7:30 p. m.

R. W. MASTERS, W. M.
A. W. TOWER, Sec.

MODERN MAGIC

(Continued from Page One)

that looked surprisingly like wine part of the time and that visibly changed from a clear fluid to a ruby one while the audience regarded it.

One very pretty stunt was the juggling of twelve large steel rings which linked themselves together or separated at a touch in spite of their apparent solidity when examined by the "assistants."

Harry Shigetia, a Japanese gentleman highly polished in manner, was the outstanding artist of the evening in cleverness and dexterity. His manipulation of cards surpassed anything ever seen here, for he made them disappear into the air from the ends of his finger tips and reappear at call at the ends of his fingers instead of in his palm where they are ordinarily found. He also had the closing stunt in which Messrs. Pulliam, Crofton and Von Oven acted as assistants. For this act he had provided a cloth cabinet which was, of course, a thing of curtains exhibited to the audience as containing no furniture and far enough above the floor to reveal the presence of any standing figure within. At his request his wrists were securely tied by Mr. Pulliam and Mr. Von Oven with a strong band which held them together about a foot and a half apart in front. They were asked to make sure that the knots were securely tied to prevent any slipping and the actor demonstrated that it would be impossible with so little lee-way for him to get his hands behind his back. He then retired to the cabinet and almost instantly reappeared with his hands tied behind his back in precisely the same manner. All this time he had worn his coat. He then announced he would remove his coat, disappeared again and as promptly returned to view with the coat missing. Mr. Von Oven was then persuaded to lend his coat and a similar disappearance took place and reappearances with the coat investing the form of the magician, his hands still tied. In the final stunt Messrs. Pulliam and Crofton were delegated to assist Mr. Von Oven in donning his coat while an assistant handed into the cabinet the coat of Shigetia, who reappeared arrayed in it before Mr. Von Oven's garment had been adjusted. It was an astonishing exhibition of dexterity regardless of how it was done.

In the clever and amusing acts of Dana Walden in which he was assisted by children, a copy of the Glendale Evening News was used and elaborately exhibited to the audience with the remark: "You see there's nothing in it," which, of course, won applause.

The full list of performers was W. J. Nixon, Mr. Glydon, G. W. Robinson, F. Fewins, Prof. H. G. Cook, Dana Walden and J. M. Foley. The music which accompanied some of the "experiments" was charming and greatly helped in keeping up the illusion.

SILVER LINING OF MARKET BREAK

WASHINGTON, November 13.—Government officials today declared that the break in the stock market yesterday will release \$800,000,000 for local enterprises throughout the country and will have a material effect in reducing the cost of living.

They pointed out that when the wave of speculation started after the armistice was signed, the so-called "farmer-bankers" throughout the country sent their money to New York to be loaned for a short time to brokers, sometimes as short a time as twenty-four hours. The money was used for speculation. High interest attracted great quantities of these funds. The break in the market, it is considered, marks the end of the wild speculative period which followed the armistice and this money will now go back to the banks and will be loaned locally.

FOREST FIRE PREVENTION

For hundreds of years prior to the advent of the white man, the Indians, who were then the only custodians of our forests, prevented destructive fires by periodically setting surface fires, to remove the litter of dead leaves, twigs, underbrush, etc., thus preventing its accumulation to the extent of furnishing fuel for destructive or crown fires.

That this method of preventing destructive fires was successful is shown by the fact that the forests taken over by the white man rarely bore scars of trees destroyed by fires. On the contrary, these forests included the Big Trees, thousands of years old; also the ordinary forests intact, with trees uninjured by fire, hundreds of years old. Almost all of these trees, however, bore evidence, by their charred bark, of the surface-firing practiced by the Indians.

Notwithstanding the fire protection afforded to the forests by the Indians, the white man, oblivious of the wisdom he might have learned from the Indian, insists upon rigid suppression of all forest fires, with the result that the accumulation of litter in a few years furnishes the fuel for conflagrations which entirely destroy the forest.

Captain Joseph A. Kitts of Grass Valley, California, a civil engineer of years experience in the woods, has prepared a plan which deals with the historical facts of this situation, and elucidates the practical methods which might be adopted by our Government to

SHASTA HIGHWAY CONTRACT COMPLETED

The California Highway Commission has accepted and declared satisfactorily completed the contract of Connors-Green & Co. for the construction of a section of the State highway in Shasta county, between the northerly boundary and Hazel Creek, a distance of 11.3 miles.

Eat Broadway Bakery Bread To Reduce the Cost of Living

Steadily advancing food prices are making many a housewife take serious thought in order to make her housekeeping allowance purchase sufficient food of the right kind for her family, especially for the growing children who demand nourishing tissue-building food.

Have you ever considered serving more bread to your family to reduce the cost of living? Bread costs more than it did some years ago, it's true, but if you buy **Broadway Bakery Bread** it is the cheapest thing you can buy in the way of food, because it contains more nourishment than any other kind of food of equal price.

Broadway Bakery Bread is not merely a filler; it is not only appetizing, it is wholesome and nourishing and filling. Give the children a slice of **Broadway Bakery Bread** when they are hungry. They will relish it and it will do them good.

protect our forests from destructive forest fires and encourage the reforestation of areas now bare of trees. Such reforestation is essential to our timber supply, but is now largely delayed and prevented by the inefficiency of our fire protection.

The Southern Pacific Company is leading in a movement to bring the importance of this matter before the public.

Common Causes of Tire Injury

□ Tips That Will Save You Dollars □

By M. D. BIXBY

Los Angeles Branch Manager, B.F. Goodrich Rubber Co.

BLOWOUTS RESULTING FROM STONE BRUISE

One of the most mysterious things that happen to pneumatic tires is the blowout that follows a stone bruise.

A tire may sometimes "blow up" while standing still. Likewise it may give way while running over a glassy smooth pavement. In either case the owner curses the tire, its maker and the man who sold it to him.

Very few people who ride on pneumatic tires understand their qualities and limitations. Not one person in a hundred takes into consideration the terrific strain put upon tires when traveling at high speeds over ordinary roads. It is hard to visualize the terrific impact when a tire strikes a stone the size of an egg imbedded in the road while going at a speed of thirty-five miles an hour.

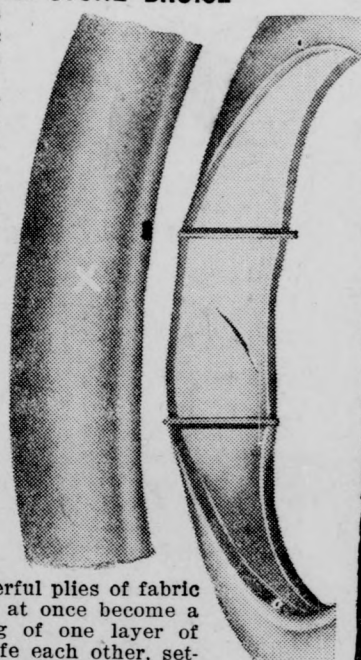

At the time such a blow is struck possibly only half a dozen threads in one or two of the powerful plies of fabric are broken. These loose threads at once become a source of trouble. The breaking of one layer of fabric permits the threads to chafe each other, setting up an internal friction that causes further disintegration. The other plies soon break down and the blowout comes, usually at a time when circumstances point to no apparent cause.

On the inside of the tire shown in this illustration, you will notice a large break in the fabric. This resulted from an accident, the wheel passing over a stone about the size of two fists, causing the injury shown without leaving the slightest mark or indentation on the outside of the case.

In a tire subjected to this abnormal strain, the fabric is bound to give way, but it does not necessarily follow that the outer cover will be marred, especially if the object is smooth and blunt. To better explain the point, if a tire under pressure should receive a hard blow from a sledge-hammer, the fabric would break in this manner without leaving the slightest mark or indentation on the outside of the case.

For your own curiosity, take a piece of heavy rubber, and with a hammer, see how difficult it is to make an indentation in it. Sometimes a tire may be run weeks after the fabric is broken from the bruise before the blowout occurs. It has even happened in a garage, with the car standing still. Sometimes the break will only exist in a few of the plies of fabric, which will pinch the inner tube, allowing the tire to deflate gradually.

Tires should be inspected by a good repair man periodically. A bruised tire can be successfully repaired by removing the damaged fabric and rubber and vulcanizing. Motorists, themselves, should occasionally examine the inside of the casing to see if the fabric is ruptured. This should always be done before an extended trip.

WORLD NEWS

MARYSVILLE, Cal., Nov. 13.—Mrs. Fred J. Wilson and her brother, Frank A. McCormick, jointly charged with the murder of Charles Brown by the brother of the dead man, appeared before Justice J. M. Morrissey for their preliminary examination here today.

A number of witnesses have been summoned for the hearing. Among them are Wesley Potts, Arvin Ward, Mrs. Florence Howard, sister of Mrs. Wilson and McCormick, Mrs. F. A. McCormick, William Dews and F. M. Lipp.

Conflicting testimony at the coroners' inquest failed to establish whether Brown was armed at the time of the shooting and if he first fired at McCormick.

POINCARÉ GOING TO SCOTLAND

LONDON, Nov. 13.—President and Madame Poincaré with their staff left London today for Glasgow, where various civic festivities have been arranged in their honor. They will stay the night at the palatial residence of Lord Blythswood, and tomorrow the president will be installed Lord Rector of Glasgow University. The distinguished travelers were accorded a hearty sendoff from Euston Station. The president returns to France Friday.

FRENCH PRESIDENT HEADS OLD UNIVERSITY

GLASGOW, Nov. 13.—Scotland gave a vociferous welcome to President Poincaré today, when accompanied by Madame Poincaré and a notable entourage, he was the guest of the Lord Mayor and Corporation of Glasgow.

The freedom of the city was first presented, and afterwards the distinguished visitors were conducted in state to the university, where Poincaré was installed lord rector, or honorary head of the institution. Many famous ex-rectors hid gorgeous uniforms and badges of honor under scholastic gowns.

After the solemnity of the installation, the undergraduates whooped their welcome in time-honored "varsity" style.

The president makes the long railway journey back tonight embarking for France again tomorrow morning.

The Glendale National Bank

is not a state-wide bank, it is a strictly local institution. Its stockholders and officers are local people and local men and women are its patrons. We solicit the accounts of Glendale people who know the value of good banking connections and want to do business at a bank where the officers are men they know. The growth of this bank has been satisfactory but we can handle your account.

Wonderful Opportunities in the Automobile Field

The history of American industries shows nothing which can compare with the rapid growth of automobile manufacturing. In the past few years a wonderful industry has been developed. In the United States alone there are over 500 factories at work on automobile construction, representing a capital of about \$2,000,000,000. Besides there are about 32,000 dealers in the United States employing several hundreds of thousands of men and women.

The development of automobile delivery trucks and light wagons is proceeding rapidly and every year sees the introduction of new makes in large numbers.

The demand from factories, garages, and salesmen for trained men is a direct result of this marvelous growth. The supply of such men is small—their pay correspondingly high. This is the field of opportunity you can enter through the sure, easy Home-Study Courses of the

International Correspondence Schools OF SCRANTON, PA.

Hundreds of thousands have proved it. The designer of the Packard "Twin Six" and hundreds of other engineers have climbed to success through I.C.S. help. For 28 years young men in offices, stores, shops, factories, mines, railroads—in every line of technical and commercial work—have been winning promotion and increased salaries through the I.C.S. Over 130,000 men are getting ready right now in the I.C.S. way for bigger jobs ahead. No matter where you live the I.C.S. will come to you. No matter what your handicap or how limited your means, the I.C.S. have a plan to meet your circumstances. No matter how small your previous education, the simply written, wonderfully illustrated I.C.S. textbooks make it easy to learn.

Co-Designer Liberty Motor

I take great pleasure in recommending your Courses to any young man who is ambitious and anxious to get the necessary education to enable him to make the most of his opportunities.

JESSE G. VINCENT,
Vice-President of Engineering, Packard Motor Car Company, Detroit, Mich.

Manager of the Cole Motor Car Company

I enrolled for an I.C.S. Course several years ago, and I have found the instruction contained therein to be of great value. I heartily recommend the I.C.S. to any young man who desires to make success of his life.

J. F. RICHMAN,
Factory Production Manager, Cole Motor Car Company, Indianapolis, Ind.

Complete Automobile Course

If you want to become an expert automobile driver, chauffeur, or mechanic you should study the I.C.S. Course in Automobiles, because it will acquaint you with the principles of operation, the details of construction and the types of apparatus used, making you an expert in your work. The Course is full of hints and suggestions covering all troubles and needs that may arise. As an automobile owner you cannot afford to be without the knowledge contained in this Course, whether you drive your car or employ a chauffeur. Ignorance is not only expensive to the owner, but it is dangerous to the occupants of a car.

SUBJECTS TAUGHT

Arithmetic (Optional)
Gasoline Automobiles
Bodies and Accessories
Automobile Running Gear
Gasoline Automobile Engines
Principles of Operation
Typical Automobile Engines
Details of Construction
Automobile Engine Auxiliaries

Cooling, Muffing, and Governing
Automobile Carburetors
Fuels and Fuel Tanks
Principles of Carburation
Forms of Carburetors
Electric Ignition
Ignition Apparatus
Current-Distributing Devices
Ignition Systems

Direct-Current Generators
Magnetoelectric Generators
Spark Control
Transmission and Control Mechanism
Friction Clutches
Transmission Mechanism
Control Mechanism
Bearing and Lubrication
Automobile Tires

Tire Deterioration and Repairs
Automobile Operation
Care of Automobiles
Troubles and Remedies
Automobile Engine Troubles
Carburetor and Ignition Troubles
Overhauling and Repairs
Automobile Equipment
Electric Starting and Lighting
Examples of Electric Systems

Automobile Electric Equipment Course

Through this I.C.S. Course of Home Study any person familiar with its contents will be able to install, test, adjust, and repair intelligently and successfully, as far as it is possible to do so with ordinary garage equipment, all kinds and makes of starting motors, generators, and ignition devices, including magnetos and all modern timer-distributor ignition systems.

SUBJECTS TAUGHT

Electric Ignition
Electricity and Magnetism
Electric Circuits
Magnetism and Magnetism
Primary Batteries
Secondary or Storage Batteries
Direct-Current Generators
Details of Construction
Induction Coils

Typical Battery and Generator Systems
Magnetoelectric Generators
Details of Magnetoelectric Construction
Ignition Apparatus
Current-Distributing Devices
Dynamo and Storage Battery Systems
Magnetoelectric Ignition Systems

Single Magneto Ignition Systems
Dual and Double Magneto Ignition Systems
Miscellaneous Ignition Systems
Automobile Operation
Electric Starting and Lighting
Examples of Electric Systems
Troubles and Remedies
Overhauling and Repairs

When everything has been made easy for you—when one hour a day spent with the I.C.S. in the quiet of your own home will bring you a bigger income, more comforts, more pleasures, all that success means—can you afford to let another hour of spare time go to waste? Make your start now. Just fill in your name and address in the lower right-hand corner of this advertisement, and send it to us. We will be glad to explain our plan to you without delay and without any expense or obligation on your part.

Common Causes of Tire Injury

o Tips That Will Save You Dollars o

By M. D. BIXBY

Los Angeles Branch Manager, B.F. Goodrich Rubber Co.

If the harmful results from the use of Inside Protectors or Puncture-proof Bands were fully realized, few of them would be used in new tires.

There is Nothing that will More Quickly RUIN a New Tire.

While they may accomplish all they are represented to do in staying or preventing punctures, yet their use is so injurious as to offset this feature. A tire is scientifically made and the adding of any number of plies of fabric is detrimental. The employment of an inside band not only reduces the resilience of a tire, but the additional thickness creates heat. This is not only destructive to the fabric, as shown in the sketch, but it also weakens the adhesive qualities of the rubber between the plies of fabric and blistering follows.

Protectors should only be employed as a means of prolonging the life of old and practically worn-out tires.
